Subject: HPNS | Planned open house event Sept 13-16

Heather,

I wanted to check-in on the Navy's planned virtual open house event on the BCT Calendar for September 13-16. Does the Navy still plan to support this event on the scheduled dates?

If the Navy plans to continue with the event on these dates, could you please:

- specify the advertising strategy for the event;
- provide the draft updated slides/information from the March session, specifically information on the Parcel G work, for regulatory agency comments; and
- schedule a meeting to discuss how to communicate the Strontium-90 data.

Thank you, in advance, for your time on this matter. Such virtual open house events help to transparently provide information to the public. However, such events are a substantial amount of work and requires coordination among many people.

Please advise,

Yolanda Anita Sanchez, MS, MPA
